-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,549,630 to Bonutti. Bonutti discloses in figure 4 a hollow guide sleeve (82 and 112) through which an anchor may be passed (though not necessarily the one disclosed in the Bonutti reference). A shoulder is formed between the point at the distal end of element 112 and the face (the distal end) of element 82. Figure 5 illustrates a bevel at the point.

Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,200,322 to Branch et al. For claims 1-8 and 11, the Branch patent discloses in figures 2a and 2b a hollow guide sleeve through which an implant is passed (column 6, lines 46-53). The device includes a single point (either point 38 or point 42) projecting from the annular face.

Alternatively, for claims 1-11, figures 4a, 4b and 17 disclose a guide sleeve 100 having a face 140, a point (either 154 or 148), a shoulder 152. The device further includes a "suture anchor" 8 (which is only positively recited in claim 11 and need not disclose a suture), and an anchor rotator 220 and 224.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Jacob Davis whose telephone number is (571) 272-4693. The examiner can normally be reached on M-F.
